*PhytoPower is an amazing combination of probiotics, prebiotics, whole foods, and digestive enzymes, blended to create and cultivate the perfect gut microbiome environment.*

### HOW DOES IT WORK?

First, over 20 billion CFUs of probiotics spread all throughout the gut to promote a healthy and active gut microbiome. Those probiotics are fed by prebiotic “fertilizer,” and help the body absorb the unique phytonutrients contained in each whole-food color blend. Finally, five unique digestive enzymes help your body break down a variety of foods and lay the groundwork for better probiotic activity.
