

PRODUCT PROFILE: NEXT BALANCE

A BALANCED, HEALTHY GUT

The world is an amazing place. It contains all the ingredients and natural solutions we need to manage and enhance our health. And gut health is no exception. Next Balance uses the most potent superfruits found in nature to strengthen, nourish, and diversify our gut microbiomes. Additionally, Next Balance employs the power of Red light fermentation to boost the healthy compounds of noni, a key ingredient and one of the world's most miraculous treasures.

HOW IT WORKS

All the amazing ingredients found in Next Balance work with your gut's unique biotic environment to promote the growth of good bacteria and bring balance to your gut microbiome.

From the very first sip, you will feel Next Balance working to improve the condition of your gut microbiome. Red-light fermented noni introduces new, friendly bacteria into the gut, and fortifies the gut microbiome with an impressive array of polyphenols. Polyphenols feed good bacteria and help naturally strengthen the body's intestinal barrier.

Next Balance also features an impressive superfruit blend, which boosts antioxidant levels in the body and supports the healthy function of the immune system. Every time you drink Next Balance, the antioxidant levels in your body increase, giving your body the tools it needs to defend against free radicals and other distressing events that hurt your gut health.

HOW TO USE

Next Balance comes in a beautiful 750 ml glass bottle, which protects the nutritional integrity of the product. It tastes great, and it's easy to drink every day. For best results, drink one or more ounces daily.

Next Balance is delicious on its own, but it can also be mixed with other liquids or blended into a smoothie.

Store Next Balance in a cool, dry place before opening. Refrigerate after opening to maximize Next Balance's nutritional potency.

WHAT YOU CAN EXPECT

Next Balance was designed to promote a balanced, healthy gut microbiome. This, in turn, will support these healthy systems and functions in the body:*

IMMUNITY

MENTAL ACUITY

SKIN STRUCTURE

HEART HEALTH

CIRCULATION

ELECTROLYTE & ACIDITY BALANCE

INFLAMMATION RESPONSE

ENERGY

AGING PROCESS

YOU'LL LOVE THIS

Next Balance features Red Light Fermentation technology for its fermented noni fruit. This unique and proprietary fermentation method has been shown to increase polyphenol count by 25%. Polyphenols are known to be the building blocks of good gut health. Polyphenols act as prebiotics to feed good bacteria, they help to increase the population of good bacteria, and they also naturally treat gut-health issues like inflammation.

SUPERFOODS FROM AROUND THE GLOBE

Next Balance is a collection of superfruits and superfoods known the world over for their amazing health benefits. Each ingredient in Next Balance was carefully considered and chosen based on its bioavailability in the body, and its compatibility with the other ingredients. You won't find a better or more diverse balancing blend than Next Balance.

FAQs

Q: What does Next Balance do for my gut health?

A: Next Balance promotes a healthy, balanced gut microbiome by feeding the good bacteria in your gut with fermented foods and polyphenols. Fermented foods are known to deliver beneficial bacteria to the gut, and polyphenols act as prebiotics, helping good bacteria multiply.

Q: What is Red-light Fermentation?

A: Red-light fermentation is a unique and proprietary fermentation process exclusive to LoveBiome. Featured heavily in both Next beverages, Red-light Fermentation increases the efficacy, bioavailability, and nutritional potency of ingredients like noni. Studies have shown, for example, that red-light fermentation increases noni's polyphenol count by at least 25%. In other words, red-light fermentation takes a good thing like noni and makes it GREAT.

Q: Is Red-light Fermentation technology used by any other noni company? Or can it be found in any other noni product?

A: No. Red-light Fermentation is a patented process, and it is owned exclusively by LoveBiome.

Q: Is Next Balance a noni juice?

A: Red-light-fermented noni is featured prominently in both Next beverages, and it is an immensely important ingredient for gut health. But calling either Next Balance or Next Detox a “noni” product would be incomplete. Next Balance is a globally sourced product with a wide array of superfoods and superfruits, of which noni is a part. These amazing foods were all brought together to create one superior gut-health supplement.

Q: What is the difference between Next Balance and Next Detox?

A: While both Next beverages share a few key ingredients (such as Red-light-fermented noni), each Next beverage has its own unique formula and was designed for its own unique purpose. Next Balance was specifically formulated to balance and diversify the gut microbiome, while Next Detox was made to assist the body's natural detoxification process to rid the gut microbiome of harmful substances.

Q: When/how should I take the Daily 3 System?

A: You can combine the Daily 3 products together in one drink or consume them separately, whatever your preference is. You can also take them at any time of the day.

Q: Why do I need to take all three products?

A: Each of these unique products combine to form the Daily 3 System, a synergistic daily regimen that optimizes your gut health. For more detailed information on each of these products, please visit lovebiome.com/products.

Q: I currently take a probiotic supplement. Will the LoveBiome products interfere with my current probiotic regimen?

A: The Daily 3 System can certainly be taken in conjunction with any probiotic regimen you may currently be taking. The Daily 3 System provides prebiotic, probiotic, and postbiotics which will not interfere with any other dietary supplements.

Q: Do you have caffeine in your products?

A: There is no added or naturally occurring caffeine in any of the Love Biome Daily 3 products.

Q: Are LoveBiome products soy and estrogen free?

A: Yes

FAQs

Q: Is Next Balance truly gluten free and ok for people with Celiacs disease?

A: Next Balance is Gluten free.

Q: Can pregnant women use your products?

A: Yes, our products are safe for pregnant women at the recommended serving sizes.

Q: Is there an age limit as to who can take the Daily 3 products?

A: At the recommended serving sizes anyone over the age of 2 can consume the Daily 3 products.
